TIPS FOR VIEWING THIS PRESENTATION:

1. Take advantage of the built-in **Table of Contents** by clicking on the **palette icon** (show/hide navigation pane) located just to the right of the printer icon. Or you can go up to **WINDOW...** then select **Show Bookmarks**.
2. After selecting from the menu on the left, click on the palette icon once more and the selected section will open full screen for easy viewing.
3. To go to a website on the Internet from this pdf file, right click on the web or email address, then select **"Open Weblink in Browser"**.

Bose Lifestyle™ 12 Series **Home Theater System**

Get state-of-the-art surround sound at the push of a button with the Bose Lifestyle® 12 Series II home theater system, the most popular Bose home theater system ever! This all-inclusive package is the easiest way to bring 5.1-channel audio into your home theater, allowing you to hear two discrete channels in the rear as well as three in the front — the same way you hear it in today's movie theaters.

Whether you're watching with your DVD player, DSS satellite dish or HDTV, you'll hear surround sound that's clearer and more lifelike. And unlike conventional systems, the Bose Lifestyle® 12 system delivers five-channel surround sound from everything else you play, thanks to Bose Videostage® 5 decoding circuitry. It delivers an experience rivaling that of 5.1 from VHS tapes, stereo CDs, and even older mono TV programs.

But the technology doesn't stop there. New tonal adjustment technology automatically delivers just the right amount of bass when switching between music and movies. New Bose Digital Dynamic Range® compression lets you hear soft sounds — particularly dialogue — even at low, late-night listening levels, and still appreciate the impact of loud special effects. It's all done automatically. You simply can't get this performance anywhere else.

What's more, with the Lifestyle® 12 system, the equipment never gets in the way of your experience. Five cube speaker arrays, each about the size of a wine glass, fill your room with dramatic sound for movies and music. The Acoustimass® module delivers deep, rich bass with lots of impact — but without audible distortion, so you can hide it behind furniture or plants. And the slim music center with CD player and AM/FM stereo tuner replaces a complex rack of equipment. The easy-to-use remote control works through walls and floors. Just push one button to enjoy five-speaker surround sound from any source!
