Low Voltage Electronic Specialist

TIPS FOR VIEWING THIS PRESENTATION:

1. Take advantage of the built-in **Table of Contents** by clicking on the **palette icon** (show/hide navigation pane) located just to the right of the printer icon. Or you can go up to **WINDOW...** then select **Show Bookmarks**.
2. After selecting from the menu on the left, click on the palette icon once more and the selected section will open full screen for easy viewing.
3. To go to a website on the Internet from this pdf file, right click on the web or email address, then select **"Open Weblink in Browser"**.

Kustom™ Multi-Source Whole-House Stereo

- Listen to your tunes from the bedroom, office, workout room or patio
- Adjust volume without walking back and forth to the main stereo
- Control A/V components with their original remotes from other rooms
- Choose any of six stereo components independently in each zone

Imagine Hawaiian music in the living room, jazz in the bedroom, and party music in the recreation room, all from the same A/V system! The **Kustom™** Whole-House (remember Kustom™ Guitars) system replaces six (6) amplifiers. It takes input from up to 6 sources – CD player, VCR, satellite dish, Cable HBO, DVD, and more – and distributes it to 6 rooms with powerful 240 watts total output. Stylish wall-mounted controllers give you keypad control over **volume and selection** in each room, so you can turn your home into a multi-zone listening paradise.

Other features include a 5V trigger voltage in and out for external system control (e.g., sophisticated home automation systems) or to turn on other ancillary equipment, four source-specific IR emitter inputs (for using multiples of same source devices), and four summed common mode IR emitter inputs for IR emitters. Each amplifier channel is on a modular card and is field replaceable.

Two Styles of Wall Controllers to Choose From

The Kustom 6-Source, 6-Room system can work with two different styles of keypads (see descriptions below). Keypad may be mixed and matched depending on your needs and/or budget. One keypad, of either type is required per speaker zone. Speakers attached to a zone without a keypad will not operate.

The **8270CS 6-Source Selector with IR Repeater** allows you to control volume and select components, plus feature MUTE and ON/OFF system control via an IR function. Imprinted replaceable key caps for source selections let you customize your installation. This wall controller installs in a single-gang box with a small depth.

The **8270CD 6-Source Selector & Numeric Keypad** performs all the functions of the basic selector plus the ability to control your audio source devices. This keypad learns IR signals from your AV device's existing remote controls and plays them back when any of the buttons are pressed. It's like having a programmable learning remote control in the wall for each room! With this keypad you can skip songs on a CD, change the music channel on your satellite television receiver, or do anything you would normally do with the original remote control, including macros! The Keypad mounts into a double-gang electrical box or low-voltage mud ring.

Expand With Additional Accessories

Along with keypads, we provide Single IR Emitters made specifically for use with the Kustom system. These emitters are attached to the end of a 10-ft. cord and plug into to the back of the Kustom amplifier for remote operation of the original source units from IR-equipped wall controllers. You may use as many as six IR emitters per amplifier.

We sell and install the **Kustom™ 6-Source Whole-House** system as a complete package including the following:

One 6 Room, 6-Source Amplifier

Six 6-Source In-Wall Selectors w/ Infrared Repeater

Six I R emitters (one for each component in you're A/V rack)

Six Speaker Cables pulled through the attic to each room

Plus all Installation and equipment programming

In addition, you may replace the **8270CS** 6-source In-Wall Selectors with the **8270CD** double gang 6-source Selector & Numeric Pad for a few \$\$\$ more.

We use your speakers or we can provide 6 pairs of your choice:

Ceiling Speakers w/ 6.5" Polywoofer & 1" Tweeter (white) **or**

In-Wall Speaker w/ 6.5" Polywoofer & .75" Tweeter (white) **or**

Outdoor Speaker w/ 5.5" Polywoofer & .75 Tweeter (black or white)
